

# SILVASORB APPLICATION

## PREPERATION

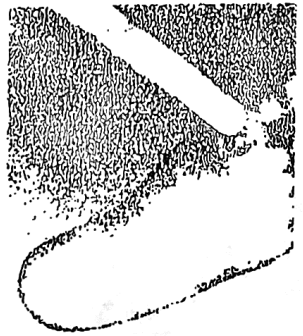

WASH YOUR HANDS THOROUGHLY

RINSE THE WOUND GENTLY WITH SALINE TO REMOVE ANY RESIDUAL GEL OR DEBRIS.

## APPLICATION

USING AN APPLICATION AID SUCH AS A Q-TIP, APPLY A CAREFULLY MEASURED QUANTITY OF SILVASORB GEL TO COVER THE WOUND IN A THIN CONTINUOUS LAYER.

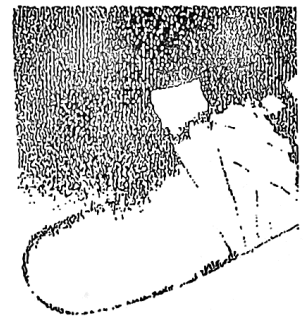

DO NOT TOUCH TIP OF THE OPEN TUBE OF SILVASORB TO ANY SURFACE.

PLACE A SALINE MOISTENED GAUZE ON THE WOUND. THE GAUZE SHOULD COVER THE ENTIRE OPEN WOUND.

BANDAGE THE WOUND. PLACE A SMALL, DRY GAUZE OVER THE MOISTENED GAUZE TO PREVENT MOISTURE IN SOCKS OR SHOES. WRAP A SOFT, DRY GAUZE BANDAGE AROUND THE DRY GAUZE

SECURE THE GAUZE WRAP IN PLACE WITH ADHESIVE TAPE. MAKE SURE THE ADHESIVE IS SECURED TO GAUZE AND NOT TO SKIN.
